Technical Skills

Languages:

C, C++ (Competitive Programming), JavaScript (ES6+), TypeScript, Python(Object OrP), SQL

Frameworks & Technologies:

ReactJS, NextJS, React-Redux, Progressive Web App (PWA), Material-UI, Tailwind, Chart.js, Django, Node.js, Express.js, GraphQL, RESTful APIs, TreeQL, MongoDB, PostgreSQL, Jest, Vitest.

Tools & Methodologies:

Git (Version Control), Netlify, Jira, Jenkins, Cursor, Figma, Agile, Waterfall

Professional Experience

Manaknight Digital inc.

Web Application Developer – Toronto, Ontario, Canada

January 2024 to November 2024

- Delivered robust front-end implementations using React.js, enhancing usability and performance.
- Designed and integrated AI-driven features like chat assistance, voice-to-text, and document handling for seamless interactions.
- Optimized API integration, database connections, and deployment pipelines to ensure system efficiency.
- Collaborated with cross-functional teams to deliver scalable and feature-rich solutions within tight deadlines.
- Developed an intuitive one-click deployment and live preview system for smoother project launches.

Project: **Baas Brand**

- Implemented AI-powered chat and voice translation tools to improve accessibility and engagement.
- Unified backend and database systems, ensuring smooth integration across web and native platforms.
- Developed one-click deployment and live preview systems, simplifying the development-to-launch process.

MedLink Healthcare Private Limited.

Software Engineer – Hyderabad, Telangana, India

February 2022 to December 2023

- Enhanced user interfaces by transforming Figma designs into responsive, React-MUI-based web applications.
- Integrated GraphQL APIs to streamline data retrieval and improve platform functionality.
- Utilized Context API for efficient state management and seamless user experiences.
- Strengthened data accuracy and reliability, boosting platform stability for job and resume search features.

Project: [MedLink Jobs](#)

- Enabled advanced job and resume search features with efficient GraphQL API integration.
- Designed a smooth, functional UI to ensure effortless navigation for job seekers and employers.
- Maintained secure data handling and optimized platform performance for high-user traffic.

Personal Projects

Department Management Web App – Aug 2024 to Nov 2024

[Live Site](#) | [Front-end Github](#) | [Backend Github](#)

Worked as the Frontend Lead for a dynamic web application to streamline workflows for Admin, Teacher, and Student Roles.

- Designed and developed responsive interfaces for user management, class schedules, and notifications, achieving an Accessibility score of 85 and a Best Practices score of 74.
- Implemented role-based access control for secure and intuitive usage.
- Delivered a seamless user experience for managing admissions, assignments, and semester activities.
- Conducted code reviews, resolved UI alignment issues, and fixed major bugs, improving performance by 30%.

Technologies:

React.js, State Management, Material-UI, Django-admin, Django-REST APIs, Cursor

Education

B.Sc in Computer Science and Engineering

at City University, Bangladesh

from 2023 - Present.

Language

Bangla (Native),

English (Intermediate)
