## PROFESSIONAL SUMMARY

Frontend Software Engineer with 4+ years of experience building scalable web applications using React, Next.js, and TypeScript across travel and healthcare platforms serving 100K+ users. Experienced in frontend architecture, performance optimization, search and filtering, state management, authentication, RBAC, GraphQL, REST APIs, and responsive UI development. Delivered measurable improvements, including faster admin dashboard load times, 40% better React application performance, and 30% reduced development time through AI-powered integration. Strong collaborator across design, product, backend, and mobile teams.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, HTML, CSS, SQL, Bash

**Frontend:** React.js, Next.js, Redux, Redux Toolkit, Tailwind CSS, Material UI, Shadcn UI, React Hook Form, Chart.js, Progressive Web Apps

**Architecture & Patterns:** Frontend Architecture, SSR, ISR, State Management, Data Normalization, Memoization, React Patterns, OOP

**APIs & Backend:** REST APIs, GraphQL, Node.js, Express.js, OAuth, JWT, Axios

**Database:** MongoDB, PostgreSQL, Firebase

**Tools:** Bitbucket, Jira, Figma, Postman, Linux, Stripe, Vercel, Netlify, Cursor

## WORK EXPERIENCE

**Frontend Engineer, Jetixia Travel Technology — UAE**

**May 2025 – Jun 2026**

- Architected shared React/Next.js components and workflows across 4 B2B platforms, reducing duplication and standardizing frontend development across agent, admin, and cPanel applications.
- Redesigned supplier data normalization and search, filter, and sort logic for hotel datasets covering up to 2,000 hotels, 3,000 rooms, and 100 facilities, reducing search latency and improving pricing accuracy for high-volume queries.
- Implemented multi-product travel booking workflows for hotels, flights, block seats, and packages, covering live search, pre-booking validation, Redux state management, and role-based access control.
- Researched and evaluated Google Maps and OpenStreetMap solutions, delivering map-based hotel discovery with clustering, geolocation, distance filtering, and optimized location searches.
- Standardized travel ledger workflows for markup, credit, banking, and statements across online and offline bookings, coordinating with backend engineers on API issues.
- Rebuilt the Admin Portal with reusable components, Next.js ISR, dynamic rendering, and configurable themes, eliminating a 30+ second load bottleneck to near-instant page loads.

**Technologies:** TypeScript, JavaScript, React.js, Next.js, Redux Toolkit, Material UI, Shadcn UI, Tailwind CSS, JWT, Maps API, Cursor

**Web Developer, Manaknight Digital Inc. — Canada**

**Jan 2024 – Nov 2024**

- Improved React application performance by 40% through code splitting, lazy loading, dependency reduction, render optimization, and memoization.
- Developed recursive solutions for dynamic tab requirements and nested fragments, using custom render functions and reusable components to support varied application configurations.

- Resolved complex issues across a multi-developer codebase, working with React components, nested rendering logic, API endpoints, database workflows, and web-to-mobile integrations under tight delivery deadlines.
- Integrated AI-powered requirement analysis through API integrations, improving requirement interpretation and reducing development time by 30% across at least 5 client projects.
- Resolved Android and iOS build, export, and runtime issues, enabling generated applications to run reliably across mobile platforms.

**Technologies:** JavaScript, React.js, Redux Toolkit, Material UI, Tailwind CSS, JWT, Axios, Postman, AI Integration, Progressive Web Apps

**Frontend Software Engineer, MedLink Healthcare Private Limited — India**

**Feb 2022 – Dec 2023**

- Translated Figma designs into production React and Material UI interfaces for job search and healthcare recruitment workflows supporting 100K+ users.
- Implemented frontend authentication with AWS Cognito, including refresh-token handling and environment-based session configuration.
- Developed job seeker and recruiter profile workflows covering profile management, resume uploads, validation, search, and document management.
- Standardized responsive layouts across 20+ screen sizes using Material UI breakpoints, improving UI consistency and reducing cross-device testing effort.
- Improved job and resume search performance for 50K+ users through GraphQL integration and frontend optimization.

**Technologies:** React.js, Material UI, GraphQL API, AWS services API, Firebase, Geolocation, Figma

## EDUCATION

Higher Secondary School Certificate in **Science**

**Government Maulana Mohammad Ali College, 2018 – 2020**

Bachelor of Science in **Computer Science and Engineering**

**City University, Bangladesh, Expected 2026**

## LANGUAGE

**Bangla:** Native

**English:** Professional Proficiency
